

Dataset Description

This dataset contains transactions made by credit cards in September 2013 by European cardholders . This dataset presents transactions that occurred in two days, where we have 492 frauds out of 284,807 transactions. The dataset is highly unbalanced, the positive class (frauds) account for 0.172% of all transactions.

It contains only numerical input variables which are the result of a PCA transformation. Unfortunately, due to confidentiality issues, we cannot provide the original features and more background information about the data.

Attribute Description

- **V1 - V28:** PCA-transformed features (anonymized for confidentiality)
- **Time:** Seconds elapsed since first transaction
- **Amount:** Transaction amount
- **Class:** Target variable (1 = fraud, 0 = legitimate)
